PROFESSIONAL SUMMARY

Multidisciplinary Graphic Designer combining evidence-based strategy, rigorous production discipline, and AI tool orchestration. Experienced in developing brand identity systems, physical packaging, environmental signage, and digital assets calibrated for measurable trust and legibility. Interdisciplinary background in biology, forensic, and cybersecurity, bringing systematic auditing, cognitive insight, and error-prevention to creative workflows.

SKILLS & COMPETENCIES

Core Brand & Visual Design: Brand Identity Systems, Logo Design, Typography Systems, Layout & Visual Hierarchy, Packaging & Label Design, Environmental Signage, Visual Audits & Market Positioning, Visual Communication & Storytelling.

Technical & Production: Pre-Press & Print Setup, Vector Path Optimization, Non-Destructive Photo Retouching & Manipulation, Web/Digital Asset Optimization.

AI Tools & Generative Workflows: Structured Parameter Prompting, Generative Inpainting & Expansion, AI Image Upscaling, Rapid Concept Iteration, Multi-Model Prompt Pipelines (Midjourney, Firefly, Kling, Runway, Sora).

Software & Frontend: Adobe Illustrator, Photoshop, InDesign, Figma, Canva, Capcut, HTML5, Modern CSS/Sass, JavaScript fundamentals.

GENERATIVE AI

FRAME — Creative Tool Architecture

[Live Tool](#)

- **Scope:** Eliminate prompt trial-and-error, hallucination, and lack of optical control in generative video workflows.
- **Solution:** Designed the UI/UX and built a progressive-disclosure web application that translates plain-language story ideas into deterministic, multi-parameter prompts (controlling camera optics, 3-point lighting, shot angles, and color grades).
- **Result:** Standardized prompt generation pipelines across Sora, Runway Gen-2, and Kling, streamlining visual storyboarding into an efficient, single-screen creative workflow.

SELECTED PROJECTS & CASE STUDIES

Bakkengrow — Asset Management Visual Identity

[Portfolio](#)

- **Scope:** Establish authority and resolve category skepticism for an emerging wealth (cryptocurrency).
- **Solution:** Designed a conservative brand identity system featuring an origami-inspired master mark, an authoritative color palette, a dual-register typography scale, tagline, and corporate stationery/ad assets.
- **Result:** Achieved 100% internal narrative adoption, with executive founders utilizing the visual origami logic as a core storytelling device in active investor pitch decks.

Veenu — Cafe & Restaurants

[Portfolio](#)

- **Scope:** Rebrand a transit-corridor restaurant to intercept highway travelers at 80 km/h against a 10-year entrenched incumbent, relying on a 3-second visual trust signal.
- **Solution:** Conducted a 10 km corridor visual audit, engineered a geometrically reduced logo mark readable from 200 meters, and developed high-contrast earthen highway signage alongside print-ready takeaway packaging dielines.
- **Result:** Drove a 60% surge in baseline footfall within 6 months of rollout, with travelers explicitly citing clean visual signage as their primary stopping reason.

CERTIFICATION

1. Business Problem-Solving & Communication	McKinsey Forward Program
2. Agentic Workflows & AI SDLC	Google / Kaggle
3. Logo Design: Visual Identity & Symbology	Sagi Haviv
4. User Experience Design Essentials	Udemy
5. Modern Web Architecture (HTML5, Modern CSS/Sass, JavaScript)	Udemy

EDUCATION

M.Sc. — Forensic Science

Govt. Holkar Science College, Indore (M.P.)

CGPA: 7.31

B.Sc. (Hons.) — Forensic Science

SAGE University, Indore (M.P.)

CGPA: 7.30

INTEREST

Human Behavior Biology: The most interesting thing to me in the world is the human brain and mind, and the most interesting question to me is 'Why do people make choices?' A dive into Cognitive and Behavioral Psychology.
